

HydroKNCT

BY HYDROPATH®

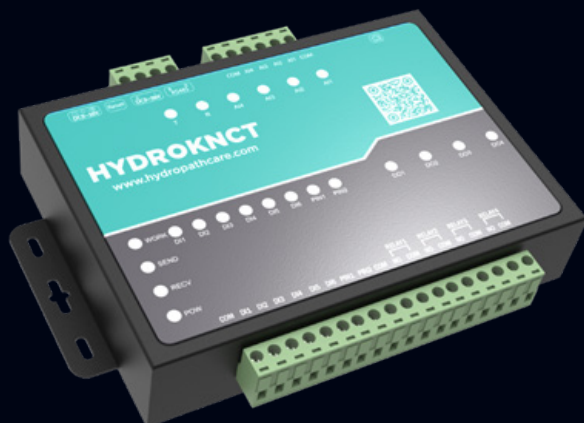

Take complete control
over your *HydroFLOW®*
ecosystem.

Introducing HYDROPATH
Care and *HydroKNCT*.

HYDROPATH Care is a Project Management Monitoring System (PMMS) integrated with the *HydroKNCT* system, enabling real-time global monitoring for customers, partners, distributors, and tracking of their *HydroFLOW®* installations.

HydroKNCT is a future-proof IOT device that connects to *HydroFLOW®* units and offers flexibility and worldwide compatibility. It connects to the internet via LAN, minimising costs and enhancing adaptability for local customers.

Easy to Install

Real-time monitoring

Installation

HydroKNCT is an advanced IoT device designed for network integration, featuring six channels for detecting dry and wet nodes, four relay outputs (COM and NO), four channels for analog detection (current 4-20mA), and a transparent transmission via a serial port. It communicates seamlessly within Modbus RTU/TCP networks. The main feature is "remote control" capability for *HydroFLOW*® unit, which enhances user-friendliness and enables customers to seamlessly integrate it into their systems for real-time monitoring.
